GE IS200BICLH1AED

IGBT Drive/Source Bridge Interface Board

Innovation Series drive interface | Board-only supply

01 / EXACT PART REFERENCE

IS200BICLH1AED
Match the complete board-edge marking, the installed drive serial number and its Material List (ML) number.

GEI-100264 describes the IS200BICLH_A__ board family.

02 / Function and installation checks

The BICL interfaces the drive main control board with BPIA, BPIB or SCNV bridge-interface circuits. Its documented functions include fault-string inputs, contactor control, four RTD inputs and fan-speed PWM control.

Confirm the selected bridge configuration and P1/P2 pin assignments. GE specifies slot 5. Qualified personnel must deenergize the drive and follow the manufacturer replacement procedure.

03 / Supply and quotation information

Condition: New | **Supply:** Board only
Dispatch: Ready to ship; confirm quantity and destination
Warranty: Bestwell one-year supplier warranty, subject to written terms.
Rack, bridge boards, cables and other accessories are quoted separately.

Include the complete part number, quantity, destination, required delivery date, installed board photos, drive serial number and ML number with your enquiry.
