GE IS200EXAMG1A

Exciter Attenuation Module

EX2100 Excitation Control | Board-only supply

01 / EXACT PRODUCT REFERENCE

IS200EXAMG1A

Match the complete installed marking and revision with the offered-board photographs. Keep the exciter serial number and Material List number with the enquiry.

02 / Function and installation checks

The EXAM module works with the ground detector to sense field-circuit ground leakage. In the auxiliary cabinet it connects a sense resistor to a resistor network across the field; the resulting voltage is returned to the ground detector.

Confirm the installed EXAM revision, EGDM or EROC ground-detector arrangement, nine-conductor cable and configured field circuit. Mounting and replacement must follow the installed system documentation.

03 / Supply and quotation information

Condition: New | **Supply:** Board only
Dispatch: Ready to ship; confirm quantity and destination
Warranty: Bestwell one-year supplier warranty, subject to written terms.
Other boards, cables, racks and accessories are quoted separately.

Include the complete model, required quantity, destination, delivery date, installed equipment identification and clear label photographs.
