Vibro-Meter IOC4T

VM600 Input/Output Card

VM600 | Product identification and purchasing

01 / EXACT PRODUCT IDENTITY

IOC4T

VM600

Match IOC4T on the card handle and record the full PNR and hardware revision from the assembly label. Standard and separate-circuits versions have different ordering references; the designation alone does not define the complete configuration.

02 / Function and configuration

Vibro-Meter IOC4T is the VM600 input/output card for an MPC4 machinery protection card. It connects four dynamic signal channels and two tachometer channels through 48 screw terminals, and provides analog outputs, four alarm relays and jumper-selectable alarm signals for rack relay cards.

For replacement: include the complete IOC4T PNR and revision, paired MPC4 reference, rack type, J1–J3 wiring and analog-output configuration.

03 / Supply and quotation information

Condition: New | **Supply:** IOC4T card only
Dispatch: Ready to ship; confirm quantity and destination.
Warranty: Amikon one-year supplier warranty under written terms.
The listing covers the IOC4T card. MPC4, rack, sensors, external cables and separate relay cards are outside the card-only supply.

Include the complete model, quantity, destination, required delivery date and installed label photographs.

Technical reference: Meggitt DS 268-071 · Version 9 · 06.01.2020.
Description pp. 1–3; connectors and ordering p. 6.
Supplier-prepared purchasing summary; separate from manufacturer documentation.
