2711P-RP2

DC logic module

DC logic module

01 / EXACT PRODUCT IDENTITY

Type: 2711P-RP2
Supplied label reference: 2711P-RP2
Family: 2711P modular operator interface

Match the complete catalog reference and hardware series on the installed unit. Application files, settings and separately required components are independent selection checks.

02 / Function and selection

2711P-RP2 is a DC-input logic module with 128 MB internal flash and 128 MB RAM for the documented 700-1500 modular operator-terminal family. It is a logic-module component, not a complete display terminal.

For replacement: include the complete product label, hardware series, receiving system, application requirements and separately required accessories.

03 / Supply and quotation

Condition: New
Supply scope: Module only
Dispatch: Ready to ship; confirm quantity and destination.
Warranty: BESTWELL one-year supplier warranty under written terms.
The listing covers the identified product only. Cables, mounting hardware and any separately required accessories are quoted individually.

Technical reference: 2711P-IN004J-EN-P · September 2009. pp. 3-6.
Supplier-prepared purchasing brief; separate from manufacturer documentation.
