Triconex 9662-610

24 VDC Digital Output Termination Panel

Tricon | Product identification and purchasing

01 / EXACT PRODUCT IDENTITY

9662-610

Tricon

The panel model, ETA part number and cable number describe different items. Match 9662-610 on the unit and check the Table 221 cross-reference before specifying separately required components.

02 / Function and configuration

Triconex 9662-610 is a 24 VDC commoned digital-output termination panel with 16 load terminals and commoned PWR+ and PWR– connections. It is used with the documented self-protected Tricon output modules; 32-point modules require two termination panels.

For replacement: include the full panel label, output-module model, interface cable, load allocation and required total current.

03 / Supply and quotation information

Condition: New | **Supply:** Termination panel only
Dispatch: Ready to ship; confirm quantity and destination.
Warranty: Amikon one-year supplier warranty under written terms.
Output modules, interface cable, field power supply and other accessories are outside the termination-panel supply.

Include the complete model, quantity, destination, required delivery date and installed label photographs.
