ABB IMDSO14

INFI 90 / Harmony

16-Channel Digital Output Module

01 / EXACT PRODUCT IDENTITY

Type: IMDSO14
Supplied label reference: IMDSO14
Family: INFI 90 / Harmony

IMDSO14 identifies the digital output module. Record the board revision, termination reference, load voltage and per-channel current before matching a replacement.

02 / Function and selection

ABB IMDSO14 is an INFI 90 digital output module with 16 open-collector outputs in two groups of eight. Its documented load limits are 250 mA per output at 24 VDC or 125 mA at 48 VDC, with field connections made through the selected termination assembly.

For replacement: include the complete module type, hardware and firmware revision, installed controller and termination references, and channel configuration.

03 / Supply and quotation

Condition: New
Supply scope: Module only
Dispatch: Ready to ship; confirm quantity and destination.
Warranty: BESTWELL one-year supplier warranty under written terms.
The listing covers the module. Termination assemblies, cables, mounting hardware and other separately requested items are outside the module-only supply.
